Subject: Launch of new Storage Water Cooler - SDLX200400B	

We are pleased to announce launch of a new model in the SDLX series - SDLX200400B.

In our existing SDLX100 – The 4 faucets are placed in the front. The gap between the taps is not enough to meet the social distancing norms in place.

To overcome this, SDLX200400B model is designed with 4 faucets - 2 on the front panel and 1 faucet on each side panel. This easily allows multiple people to draw water at the same time and avoids overcrowding thus maintaining social distance.

It also comes with a bottom drain in the tank as an additional feature.
